

Build Real AI Products in 4 Weeks

Build Real AI Products in 4 Weeks
Get Ahead Before College Starts

Why Most Students Struggle to Get Jobs

No Practical Skills

Focus on theory without hands-on experience with real tools

No Real Projects

Graduate without a portfolio demonstrating problem-solving

No AI Exposure

Missing crucial AI/ML knowledge essential in every industry

Not Job-Ready

Lack of industry-relevant and soft skills for employment

90% of students graduate without a portfolio

What You Will Learn

4-week curriculum from beginner to AI engineer

Week 1

Python fundamentals

Learn core programming concepts to build a strong foundation.

Week 2

Logic Building & Problem Solving

Develop structured thinking to solve real-world problems efficiently.

Week 3

Intro to AI & Machine Learning

Understand the basics of AI and how intelligent systems work.

Week 4

Prompt Engineering

Learn how to effectively interact with AI models to get accurate results.

What You Will Build

Real-world AI projects that showcase your skills

Build Strong Tech Foundation Only

Build a strong AI foundation by creating intelligent systems that solve real-world problems

Gain Advantage Over Other Students

Stand out with industry-ready AI projects that give you a competitive edge.

Explore AI, Coding and real world tech

Learn by building real-world AI applications using modern tools and technologies.

Make Smarter Career Decisions

Use AI to automate tasks and make smarter, data-driven career decisions.

What You Get

- ✓ Complete 4-week AI Engineering Program
- ✓ Build 4+ Real-World AI Projects
- ✓ Production-Ready Code with GitHub Access
- ✓ Hands-on Mentorship from Industry Experts
- ✓ KODRYX AI Certification
- ✓ Lifetime access to course materials

Industry-recognized certification from KODRYX AI & AI Anytime

Founder KODRYX AI
Serial AI Entrepreneur
AI Researcher
Corporate AI Trainer

WHY KODRYX AI?

Shaping Future-Ready AI Professionals

Execution Over Theory

01

We don't just teach AI — we build real-world AI systems
Students graduate with live projects + deployable skills

Global Ecosystem Advantage

02

Collaborations with AI for All Global & World AI Governance Foundation
Industry alignment through NASSCOM

Strong Academic Pipeline

03

Active university collaborations for AI programs & bootcamps
Creating a direct talent funnel from campuses to industry

KODRYX AI

CERTIFICATE OF COMPLETION

This certifies that

Victoria Wotton

Has successfully completed the 4-week AI curriculum from beginner to AI engineer at KODRYX AI, covering Python fundamentals, logic building & problem solving, introduction to AI & machine learning, and prompt engineering.
